

**REMARKS**

Claims 1-4, 7, 8, 10, 16, 18-20, 34, 40-44, 46, 52-53 and 58-77 were pending in this application. By this amendment, Applicant is canceling claims 10, 16, 18-20, 34, 40-41, 44, 46 and 52-53 without prejudice or disclaimer. Claims 1-4, 42 and 72-74 have been amended. As a result claims 1-4, 7, 8, 42, 43 and 58-77 are pending for examination with claims 1-4 being independent claims. No new matter has been added.

**Rejections Under 35 U.S.C. 112, First Paragraph****1. Written Description**

The Examiner rejected claims 1-4, 7-8, 42-43 and 58-77 under 35 U.S.C. 112, first paragraph as failing to comply with the written description requirement. Applicants have made amendments to the claims and respectfully request reconsideration of the claims as amended.

The Examiner based the rejection of the inclusion of functional variants of the MAGE-A12 HLA class II-binding peptides in the claims. Although the Applicant does not agree that the specification does not describe functional variants in a way that demonstrates to one of ordinary skill in the art that Applicant was in possession of the claimed invention including functional variants, Applicant has amended claims 1-4 to remove this aspect of the claims. Applicant reserves the right to pursue claims that include functional variants in one or more continuing applications.

Accordingly, Applicant respectfully requests that the rejection under 35 U.S.C. 112, first paragraph, be withdrawn

**2. Enablement**

The Examiner rejected claims 1-4, 7-8, 42-43 and 58-77 under 35 U.S.C. 112, first paragraph as not enabled for the aspects of the claims that recite functional variants. Applicant respectfully requests reconsideration of the claims as amended.

Although Applicant does not agree that claims encompassing functional variants are not enabled, in order to expedite prosecution Applicant has amended the claims, as noted above, to excise these aspects of the claims, without prejudice to pursuing claims to functional variants of these HLA binding peptides in one or more continuing applications. Applicant does not agree that it would require undue experimentation for one of ordinary skill in the art to practice the claimed invention, including functional variants, based on the guidance provided in the specification coupled with the knowledge in the art.

Based on the amendments made to the claims, Applicant respectfully requests that the rejection under 35 U.S.C. 112, first paragraph, be withdrawn.

**CONCLUSION**

In view of the foregoing amendments and remarks, this application should now be in condition for allowance. A notice to this effect is respectfully requested.
